

基站符合安全標準 有效支援5G網絡

*Radio Base Stations Comply with the Safety Standards
Ensure Effective Support for 5G Networks*

無線電基站的輻射安全 Radiation Safety of Radio Base Stations

通訊事務管理局採用世界衛生組織認可，由國際非電離輻射防護委員會制定的輻射安全標準

- The Communications Authority has adopted the radiation safety standards set by the International Commission on Non-ionizing Radiation Protection and recognised by the World Health Organization.

所有基站必須符合這安全標準，電訊商亦要得到通訊事務管理局批准，才可以操作新建的基站

- All base stations must meet these safety standards. Also, mobile network operators must obtain approvals from the Communications Authority before bringing new base stations into operation.
