The Work of Advisory Committees

Three advisory committees under OFCA have been established to provide a regular and formal channel for various parties to advise OFCA on telecommunications regulatory measures and policies.

Telecommunications Advisory Committees

Three advisory committees, namely the Telecommunications Regulatory Affairs Advisory Committee, the Radio Spectrum and Technical Standards Advisory Committee, and the Telecommunications Users and Consumers Advisory Committee, were established under OFCA in June 2012. These committees provide a regular and formal channel for the industry, telecommunications service users and interested parties to advise OFCA on the formulation and implementation of various telecommunications regulatory measures and policies.

Members of the advisory committees are drawn from different sectors of the telecommunications industry, relevant government departments and non-governmental organisations as well as the general public. This helps provide a balanced representation of views on issues that are at times highly technical and complex. The term of appointment is two years.

The membership lists of the three advisory committees as of 31 March 2022 can be found in [Appendix B](#).

Television and Radio Consultative Scheme

The role of the Television and Radio Consultative Scheme is to provide qualitative input on television and radio programming to the CA’s public consultation process. Members are drawn from all 18 districts of the territory.
